What is Bump Stopper Razor Bump Treatment?

Bump Stopper Razor Bump Treatment (RBT) and Bump Stopper - 2 RBT are after shave treatments for the treatment of razor bumps, razor rash, and skin irritation caused by shaving. When used as directed, they will eliminate razor bumps completely. They must be used 2-3 times daily (usually in the morning after shaving and again at night before retiring).

[Back To Top](#)

How does Bump Treatment and Bump Stopper-2 work?

Bump Stopper RBT and Bump Stopper - 2 RBT work gently sloughing the outer layer of skin to expose buried hairs. Bump stopper also breaks down the outer structure of the hair, thus making it too limp and weak to re-enter the skin as the hair grows. The treatments also contain antibacterial properties to fight infection.

What are the other products does Bump Stopper offer?

High Time Bump Stopper offers a whole line of shaving products with the special needs of a black man in mind. The shaving cream and shaving gel are specially formulated to give the ultimate in protection when shaving. The tone repair dark spot remover evens the skin tone from years of scar tissue from previous razor bumps. The after shave with cocoa butter is a cooling after shave for men who don't really need the razor bump treatments.

Customer Testimonials

Bump Stopper takes great pride in hearing from our customers that have had great success!
Let us hear from you at Info@BumpStopper.Com

Thank You! Thank You! I will definitely recomend this product to any Africian Americian male with razor bump problems.

Ms. Harper

As a family physician and surgeon, I have, over the years, become very familiar with the problems which Black Americans face with regard to shaving and ingrown facial hairs. Your product, High Time Bump Stopper, has been used by my offices for the last 2 years as a recommendation for males with difficulties with shaving and Pseudofolliculitis barbae. As I have grown to use this product and recommend it to my patients, I have found that it is indeed, in my opinion, the most effective product on the market including those which have been used as prescription medications over the counter.

S. Sailes, M.D. (Physician to the Stars)
Hollywood, California

I've tried other products that claim they can stop razor bumps with no success. While I was out shopping with my family, I noticed the Bump Stopper - 2 on the drug store shelf. So I decided to give it a try. I am pleased to say that it works!! I've been using this product now for ten days.

F.L. Frazier, Jr.
AOCS (AW) USN

I started using your products about three years ago. For years I always had a bad case of shaving bumps. I guess what I'm trying to say is your product is the greatest shaving treatment I have ever used.

P.E. Turner
Tinton Falls, NJ

Being a Black man with sensitive skin, this product has helped me a lot.

B. Mc Gee

Thank you very much for your time and efforts, keeping me stocked and care free with this "Formula".

K. Van Winkle
Alamogordo, NM

I have tried electrolysis and several other treatments. I have even considered laser surgery to kill the hair follicles totally. It was your product that proved to be the most effective and cost efficient. Now, I use electric hair clippers followed by Bump Stopper face cream to solve all my shaving problems.

D.L. Williams

I'm a two year patron of your product and, "It works". I use clipper to shave with and they help out pretty much. After all, appearance is everyone's first impression.

Sgt. K. Hume, Jr.
APO NY

After using your product for the first time I felt different in a few hours after shaving.

A. Clive
Saudi Arabia

Thank you for sending samples of High Time Products to my office. I have used and recommended this product to a number of patients.

J. A. Klein, M.D. (Renowned Dermatologist)
San Juan Capistrano, CA

Of everything I've done your bump stopper is the best thing on the market, and I have from the first week of using the product recommended it to all my friends religiously.

While in the military I shaved up, down, sideways, in circles, using magic shave, clippers, and a cream that is normally used for removing hair before surgery, boy that was a big mistake!!

G. A. Winfield
Great Britain

Bump Stopper and Bump Stopper -2 Razor Bump Treatment are both outstanding products which work well on an individual using clippers. The products are outstanding for the control and management of PFB. They have a pleasant scent and do not burn or sting when applied (2-3 times a day). These products will sell well in the Base Exchange.
